Key findings

Pool position requires checking

Some mapped evidence is unavailable or uncertain.

What we checked

These findings use the mapped information saved with this report. Distances and boundaries are indicative, not surveyed.

Pool fit AMBER - Further investigation The proposed pool position requires checking.	Water & wastewater GREY - Not assessed Water and wastewater information was not assessed.
Stormwater GREY - Not assessed Stormwater information was not assessed.	Flooding & drainage GREY - Not assessed Flooding and drainage information was not assessed.
Terrain GREY - Not assessed Terrain was not assessed.	Planning GREY - Not assessed Planning was not assessed.
Pool safety barrier AMBER - Further investigation A compliant pool barrier will be required.	Construction access GREY - Not assessed Construction access requires a site check.

Requires later verification

- Current title and registered easements
 - Exact underground service positions and depths
 - Geotechnical and groundwater conditions
- Detailed construction access
 - Final structural design
 - Final consent and approval requirements

What happens next

Recommended next stage

Site verification

- 1
- Confirm the pool position**

Review the saved mapped evidence before finalising the position.

Not verified by this report

- Current title and registered easements
- Exact underground service positions and depths
- Geotechnical and groundwater conditions
- Detailed construction access
- Final structural design
- Final consent and approval requirements

Mapping information

Sources include No mapping source summary was recorded.

Data accessed: **29 Jul 2026**

- Detailed attribution was not available in the saved report.

Selected datasets are used under their applicable licences. Mapped information is indicative.

Preliminary assessment

This report uses publicly available mapped information for preliminary planning purposes. Property boundaries, infrastructure locations, terrain and other mapped information are indicative and may differ from actual site conditions.

This report does not constitute surveying, engineering, geotechnical advice, utility locating, building consent, resource consent or approval to undertake construction. Relevant conditions and infrastructure should be independently verified before final design, excavation or construction.
