

Proposed pool: 6.5 x 3 m

Further investigation required

The proposed pool appears worth progressing, but some mapped evidence requires checking.

Preliminary feasibility only. This preliminary feasibility report is an indicative desktop screen based on available mapped information. The proposed pool position and clearances are not a survey, title confirmation, detailed design, utility locate, consent decision or construction approval. Confirm the boundary and complete normal site, service, design and approval checks before relying on this report.

At a glance

Status is shown by colour and description

Pool fit	Further investigation required	Water & wastewater	Not assessed
Stormwater	Not assessed	Flooding & drainage	Not assessed
Terrain	Not assessed	Planning	Not assessed
Pool safety barrier	Further investigation required	Construction access	Not assessed

Captured map layers

This legend records what the saved image shows.

Pool-shell clearances

Side 1: 20.6 m Side 2: 15.1 m

Side 3: 20.6 m Side 4: 15.1 m

Indicative mapped pool-shell clearances — not a survey or setback assessment.

What we checked

These findings use the mapped information saved with this report. Distances and boundaries are indicative, not surveyed.

Pool fit Further investigation required The proposed pool position requires checking.	Water & wastewater Not assessed Water and wastewater information was not assessed.
Stormwater Not assessed Stormwater information was not assessed.	Flooding & drainage Not assessed Flooding and drainage information was not assessed.
Terrain Not assessed Terrain was not assessed.	Planning Not assessed Planning was not assessed.
Pool safety barrier Further investigation required A compliant pool barrier will be required.	Construction access Not assessed Construction access requires a site check.
Requires later verification • Current title and registered easements • Exact underground service positions and depths • Geotechnical and groundwater conditions • Detailed construction access • Final structural design • Final consent and approval requirements	

What happens next

Recommended next stage

Site verification

- 1
- Confirm the pool position**

Review the saved mapped evidence before finalising the position.

Not verified by this report

- Current title and registered easements
- Exact underground service positions and depths
- Geotechnical and groundwater conditions
- Detailed construction access
- Final structural design
- Final consent and approval requirements

Mapping information

Sources include No mapping source summary was recorded.

Data accessed: 18 Aug 2026

- Detailed attribution was not available in the saved report.

Selected datasets are used under their applicable licences. Mapped information is indicative.

Preliminary assessment

This report uses publicly available mapped information for preliminary planning purposes. Property boundaries, infrastructure locations, terrain and other mapped information are indicative and may differ from actual site conditions.

This report does not constitute surveying, engineering, geotechnical advice, utility locating, building consent, resource consent or approval to undertake construction. Relevant conditions and infrastructure should be independently verified before final design, excavation or construction.
